Publishing Office

Elsevier Science Ltd, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (01392) 51558; *Fax* (01392) 425370].

Production Editor: Katherine Woolway.

Subscription and Advertising Offices

North America: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A. Rest of the World: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, England [*Tel.* Oxford (01865) 843000; *Fax* (01865) 843010].

Subscription Rates

Annual Institutional Subscription Rates 1995: North, Central and South America, US$850.00, Rest of the World £570.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Back Issues

Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1994. Earlier issues are available in high quality photo-duplicated copies as complete volumes only.

Frequency: Published monthly except June and September.

NUMBER 1

GENETIC ALGORITHMS

Samuel J. Raff 1 Preface

Anup Kumar and **Yash P. Gupta** 3 Introduction

(A) Genetic Algorithms for Flowshop Scheduling Problem

Colin R. Reeves 5 A genetic algorithm for flowshop sequencing

Federico Della Croce, Roberto Tadei and **Giuseppe Volta** 15 A genetic algorithm for the job shop problem

Ulrich Dorndorf and **Erwin Pesch** 25 Evolution based learning in a job shop scheduling environment

(B) Genetic Algorithms for Computer Science Problems

Anup Kumar, Rakesh M. Pathak and **Yash P. Gupta** 41 Genetic algorithm based approach for file allocation on distributed systems

T. Chockalingam and **S. Arunkumar** 55 Genetic algorithm based heuristics for the mapping problem

W. F. Hahnert III and **P. A. S. Ralston** 65 Analysis of population size in the accuracy and performance of genetic training for rule-based control systems

(C) Genetic Algorithms for Other Business Applications

David M. Tate and **Alice E. Smith** 73 A genetic approach to the quadratic assignment problem

Paul A. Rubin and **Gary L. Ragatz** 85 Scheduling in a sequence dependent setup environment with genetic search

Anthony Wren and **David O. Wren** 101 A genetic algorithm for public transport driver scheduling

(D) Genetic Algorithms and Hybrid Approaches

Fred Glover, James P. Kelly and **Manuel Laguna** 111 Genetic algorithms and tabu search: hybrids for optimization

P. W. Poon and **J. N. Carter** 135 Genetic algorithm crossover operators for ordering applications

A. R. Venkatachalam 149 An analysis of an embedded crossover scheme on a GA-hard problem

NUMBER 2

Dake Sun, Rajan Batta and **Li Lin** — 159 Effective job shop scheduling through active chain manipulation

Soon Seok Lee, Ho Woo Lee, Seung Hyun Yoon and **K. C. Chae** — 173 Batch arrival queue with *N*-policy and single vacation

Vaidyanathan Jayaraman and **Rajesh Srivastava** — 191 A service logistics model for simultaneous siting of facilities and multiple levels of equipment

Chung-Lun Li, T. C. E. Cheng and **Z.-L. Chen** — 205 Single-machine scheduling to minimize the weighted number of early and tardy agreeable jobs

Mohammad Kaykobad, Q. N. U. Ahmed, A. T. M. Shafiqul Khalid and **Rezwan-al Bakhtiar** — 221 A new algorithm for ranking players of a round-robin tournament

Hayri Önal, Delima H. Darmawan and **Sam H. Johnson III** — 227 A multilevel analysis of agricultural credit distribution in East Java, Indonesia

Johnny C. Ho and **Jatinder N. D. Gupta** — 237 Flowshop scheduling with dominant machines

Hüseyin Sarper — 247 Comments and corrections for the machining economics optimization article by Duffuaa, Shuaib and Alam

S. O. Duffuaa and **A. N. Shuaib** — 249 Rejoinder to Sarper's note on the machining economics optimization article by Duffuaa, Shuaib and Alam

Announcements — I

NUMBER 3

Christer Carlsson and **Robert Fullér** — 251 Multiple criteria decision making: the case for interdependence

Houn-Gee Chen — 261 Heuristics for operator scheduling in Group Technology cells

Chung-Lun Li — 277 A heuristic for parallel machine scheduling with agreeable due dates to minimize the number of late jobs

Maliyakal D. Jayakumar — 285 Cascading-heuristics for the solution of staircase linear programs

Ching-Jong Liao, Chien-Lin Sun and Wen-Ching You	297	Flow-shop scheduling with flexible processors
Yeong-Dae Kim	307	A backward approach in list scheduling algorithms for multi-machine tardiness problems
Cha-Hon Sun and Sheng-De Wang	321	An efficient pruning algorithm for value independent knapsack problem using a DAG structure
Sydney C. K. Chu and Betty K. P. Tang	335	An optimization modeling for customer redistribution and its spreadsheet implementation
Hui-Ming Wee	345	A deterministic lot-size inventory model for deteriorating items with shortages and a declining market
Announcements	I	

NUMBER 4

RELIABILITY AND QUALITY CONTROL

Samuel J. Raff	v	Preface
Moshe F. Friedman	vii	Foreword
Jee Soo Kim and Frank Proschan	357	A review: the arrangement increasing partial ordering
Mark Brown	373	The distribution of total variation distance, with applications to simultaneous confidence intervals
Philip J. Boland and Emad El-Neweihi	383	Expected cost comparisons for inspection and repair policies
Moshe Shaked, J. George Shanthikumar and Jose Benigno Valdez-Torres	391	Discrete hazard rate functions
C. E. Love, R. Guo and K. H. Irwin	403	Acceptable quality level versus zero-defects: some empirical evidence
Moshe F. Friedman	419	Statistical analysis of deadband-deviation rules in quality control
Mohamed Abdel-Hameed	435	Inspection, maintenance and replacement models
John M. Charnes	443	Tests for special causes with multivariate autocorrelated data
Philip J. Boland and Emad El-Neweihi	455	Measures of component importance in reliability theory

NUMBER 5

Ram Pandit and **B. Muralidharan**	465	A Capacitated General Routing Problem on mixed networks
Wen Lea Pearn and **C. M. Liu**	479	Algorithms for the Chinese postman problem on mixed networks
Jayaram K. Sankaran	491	A monotonic, dual-based bounding procedure for integer programs
K. Jo Min and **Cheng-Kang Chen**	503	A competitive inventory model with options to reduce setup and inventory holding costs
Moutaz Khouja	515	The economic production lot size model under volume flexibility
Zvi Drezner	525	On the conditional p-median problem
Sang-jin Nam and **Rasaratnam Logendran**	531	Modified production switching heuristics for aggregate production planning
Hyo-Seong Lee	543	Optimal control of the $M^X/G/1/K$ queue with multiple server vacations
I-Ming Chao, Bruce L. Golden and **Edward A. Wasil**	553	A new heuristic for the Period Traveling Salesman Problem
Announcements	I	

NUMBER 6

Jae-Dong Hong and **Jack C. Hayya**	567	Joint investment in quality improvement and setup reduction
Rajani R. Joshi	575	Immune network memory: an inventory approach
Buyang Cao and **Götz Uebe**	593	Solving transportation problems with nonlinear side constraints with tabu search
Adam Fadlalla and **James R. Evans**	605	Improving the performance of enumerative search methods—I. Exploiting structure and intelligence
David W. Ashley	615	A spreadsheet optimization system for library staff scheduling
P. Marcotte, G. Marquis and **G. Savard**	625	A new implicit enumeration scheme for the discriminant analysis problem
B. Jay Coleman and **Mark A. McKnew**	641	A quick and effective method for capacitated lot sizing with startup and reservation costs

P. W. Frizzell and **J. W. Giffin** 655 The Split Delivery Vehicle Scheduling Problem with time windows and grid network distances

Announcements I

NUMBER 7

Alistair Richard Clark and **Vinicius Amaral Armentano** 669 The application of valid inequalities to the multi-stage lot-sizing problem

M. A. Venkataramanan, A. V. Cabot and **W. L. Winston** 681 An interval branch and bound algorithm for global optimization of a multiperiod pricing model

Gad Rabinowitz, Abraham Mehrez, Ching-Wu Chu and **B. Eddy Patuwo** 689 A partial backorder control for continuous review (r, Q) inventory system with Poisson demand and constant lead time

Krishnamurty Muralidhar and **Dinesh Batra** 701 An investigation of the effectiveness of statistical distributions for additive fixed data perturbation

Michael C. Fu, Jian-Qiang Hu and **Rakesh Nagi** 715 Comparison of gradient estimation techniques for queues with non-identical servers

Madjid Tavana and **Snehamay Banerjee** 731 Evaluating strategic alternatives: an analytical model

Chih-Ming Liu and **Chii-Lian Lin** 745 An efficient two-phase approximation method for exponential tandem queueing systems with blocking

D. Diakoulaki, G. Mavrotas and **L. Papayannakis** 763 Determining objective weights in multiple criteria problems: the critic method

Announcements I

NUMBER 8

B. K. Mohanty and **T. A. S. Vijayaraghavan** 771 A multi-objective programming problem and its equivalent goal programming problem with appropriate priorities and aspiration levels: a fuzzy approach

Yi-Cheng Su and **M. Jeya Chandra** 779 An approximation analysis for multistage production lines

Christopher Rose and **Roy D. Yates** 793 Scheduling arrivals to queues for minimum average blocking: the S(n)/M/C/C system

Radhika Santhanam and **Jerzy Kyparisis** 807 A multiple criteria decision model for information system project selection

W. L. Pearn and **T. C. Wu** 819 Algorithms for the rural postman problem

Huan Li, Yixin Zhu and Ping Yang 829 Computational analysis of $M(n)/G/1/N$ queues with setup time

B. Awadh, N. Sepehri and O. Hawaleshka 841 A Computer-Aided Process Planning model based on genetic algorithms

C. Y. Lee and J. Y. Choi 857 A genetic algorithm for job sequencing problems with distinct due dates and general early–tardy penalty weights

Announcements I

NUMBER 9

Laura Burke and Seth Flanders 871 Using ontogenic classification networks in a smart structures application

Anito Joseph 883 Parametric formulation of the general integer linear programming problem

Saul I. Gass and Pablo M. R. Zafra 893 Modified fictitious play for solving matrix games and linear-programming problems

I. Douglas Moon and Lee Papayanopoulos 905 Facility location on a tree with maximum distance constraints

Klaus Jansen, Gerhard Woeginger and Zhongliang Yu 915 UET-scheduling with chain-type precedence constraints

Lloyd W. Clarke and G. Anandalingam 921 A bootstrap heuristic for designing minimum cost survivable networks

M. N. Gopalan and S. Kannan 935 Expected number analysis of a two-server queueing network subject to inter-stage inspection and rework

Susan X. Li and Zhimin Huang 947 Managing buyer–seller system cooperation with quantity discount considerations

Luis Gouveia 959 Using the Miller–Tucker–Zemlin constraints to formulate a minimal spanning tree problem with hop constraints

Herminia I. Calvete and Pedro M. Mateo 971 An approach for the network flow problem with multiple objectives

Author and reviewer oversight 985

Announcements I

NUMBER 10

Adam Fadlalla, James R. Evans and Martin S. Levy 987 Improving the performance of enumerative search methods—part II: computational experiments

Heeseok Lee	995	Optimal static distribution of prioritized customers to heterogeneous parallel servers
Surendra M. Gupta	1005	Interrelationship between controlling arrival and service in queueing systems
Hsing Kenneth Cheng	1015	Optimal capacity of a firm's computer backup center
Kuo-Ping Chang and **Yeah-Yuh Guh**	1031	Piecewise loglinear frontier and log efficiency measures
Ohseok Kwon, Bruce Golden and **Edward Wasil**	1039	Estimating the length of the optimal TSP tour: an empirical study using regression and neural networks
Robert T. Sumichrast and **Ina S. Markham**	1047	A heuristic and lower bound for a multi-depot routing problem
Hemant D. Gosavi and **J. MacGregor Smith**	1057	Asymptotic bounds of throughput in series-parallel queueing networks
A. K. Aggarwal, M. Oblak and **R. R. Vemuganti**	1075	A heuristic solution procedure for multicommodity integer flows
Jon M. Peha	1089	Heterogeneous-criteria scheduling: minimizing weighted number of tardy jobs and weighted completion time
Announcement	I
